

Doomsday Engine - Feature #2355

Build must fail on macOS notarization error

2019-11-30 08:03 - skyjake

Status:	New	Start date:	2019-11-30
Priority:	Normal	% Done:	0%
Assignee:	Deng Team		
Category:	Enhancement		
Target version:	Build system and tools		
Description			
If Apple's notarization server does not successfully complete the notarization, the entire build should be stopped until the issue is fixed. Otherwise it's way too easy to not notice that it has failed and the unnotarized version is going out for distribution.
