

Doomsday Engine - Bug #273

Whitespace in addon meta data

2006-03-26 02:05 - danij

Status: Closed	Start date: 2006-03-26
Priority: Low	% Done: 100%
Assignee: skyjake	
Category:	
Target version: 1.9.0-beta4	
Description	
There is currently a bug in the parsing of addon meta data in Snowberry.	
This is ok:	
implicit optionname1 (option: -pwdtex)	
This causes Snowberry to report an unknown problem in the addon meta data:	
implicit optionname1 (option: -pwdtex)	
Labels: Snowberry

The real error that Snowberry should report in this case is that there is an unterminated parentheses. Remember, the syntax rules are that when a colon is used, the rest of the line is interpreted as the value regardless of its content.

In this particular case, you should use a =:

```
implicit optionname1 ( option = -pwdtex )
```

Doh, yes of course.

I should spend some time learning Python I guess.
