

Doomsday Engine - Bug #600

Win32: No IWAD => startup hangs

2009-02-03 21:00 - danij

Status: Closed	Start date: 2009-02-03
Priority: Urgent	% Done: 100%
Assignee: skyjake	
Category:	
Target version: 1.9.7 Unstable	
Description Since the change to startup so that all work is done in DD_StartupWorker Doomsday will no longer produce a critical system message if it cannot find an IWAD in W_CheckIWAD. Currently what happens is that Doomsday will get stuck in the busy state, perpetually Sleep()'ing and no error dialog is produced.

History

#1 - 2010-05-12 14:59 - eunbolt

I believe this bug is now fixed

#2 - 2011-07-15 07:20 - skyjake

This happens only on Windows.

#3 - 2012-02-24 14:59 - skyjake

Addressed both by ringzero and improved busy mode error handling.
