

Doomsday Engine - Bug #61

The golden doors on the Seven Portals are buggy.

Target version: 1.7.9	
Description For the client in a network game, all of the doors on the Seven Portals level get reset to the closed position upon warping through the teleporters. The host does not experience this problem. Also, the client sees little blue stars on the floor in various rooms and areas. These blue stars are invisible to the host.
